Easily create and manage a tailored, branded, [Visitor](#) experience.

- Integration with our Meeting Room Module
- Unlimited visitors
- Facial recognition

You're in good company...

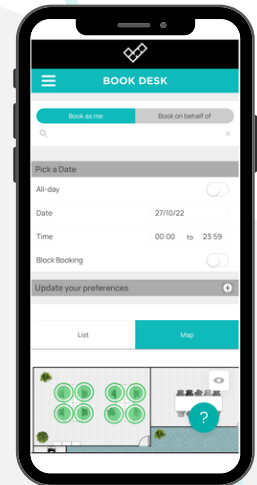

HARVEY NICHOLS

“We were impressed by how quick and easy Space Connect’s desk booking system was to roll out to all CityFibre employees. The system is so intuitive that people started using it as soon as it became available, without us having to formally train them on how to use it.”

Paul Smerkinich, CityFibre

A **Desk Booking** solution that is a convenient and efficient way for employees to find and book desks

Use our Desk Booking app to browse and choose from available desks, set the duration of their bookings, and effectively manage their bookings.

QR Code check-in

Custom Floorplans

Workspace Analytics

Real-time desk availability tracking, ensuring that multiple users do not book the same desk at the same time.

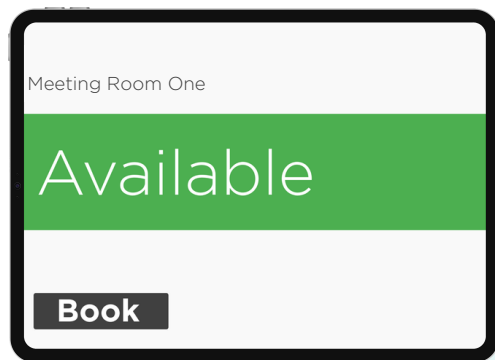

Allows workspace administrators to set booking rules and restrictions, such as limiting the number of bookings per user.

Streamlines the desk reservation process, making it more efficient and convenient for both users and administrators.

Enable Zone-based booking to allow employees to only book Desks & Rooms within their Primary or Secondary Zone.

A **Meeting Room Management** solution which has been designed to simplify the management of meetings

Use our Meeting Room app to reserve or book any meeting space, book catering and invite attendees from your phone.

Calendar Integration

An innovative room booking solution that simplifies the process of finding and booking meeting rooms.

Microsoft Teams

User-friendly interface, users can easily search for available rooms based on their preferences such as location, size, and amenities.

RFID Card Check-in

Real-time updates, ensuring that users always have the most up-to-date information about room availability.

Allows for easy integration with existing calendar systems, making it even easier for users to manage their meetings and bookings.

Overall, streamlining of the room booking process, saving time and increasing efficiency for businesses and organisations.

An effortless **Visitor Management solution** designed to efficiently manage and track visitors

Use our Visitor Management to easily create and manage a tailored and branded visitor experience to integrate seamlessly with your meeting room management.

Facial Recognition

Our visitor management solution simplifies the process of managing visitors in any facility.

Custom Branding

Visitors can pre-register for their visit, which saves time and eliminates the need for manual sign-in processes.

Visitor Analytics

Our intuitive interface and customisable features make it an ideal solution for businesses of all sizes looking to streamline their visitor management processes.

Workspace Insights that allows data and analytics to be viewed in real time for utilisation, behaviour and trends

Complete with MS Power BI free of charge, our Workspace Insights provide you with key information allowing you to make data-driven decisions within the workplace.

Occupancy trends

Power BI reporting

Detailed reports

Monitor headcount and workspace capacity.

Analyse event booking and space usage trends.

Full data extract capabilities.

Available for Desks, Meeting Rooms and Visitor Management modules.

Hardware & Software Integrations to enhancement and simplify Space and Visitor Management

Choose your solutions!

Space Connect integrates natively with leading touch screen room and desks panels such as iPad and Android, as well as room sensors.

Meeting Room Panel

Meeting Room Panel

Meeting Room + Desk Panel

Meeting Room Panel

Room Sensors

Compatible SSO Integrations

Space Connect offers integration with MS 365 & GSuite which enables simple management of desks, meetings, and visitors using authenticated SSO services.

SC Desk Monitoring App

Enhance your desk check-in process with the Desk Monitoring Application, a valuable tool for automating user presence detection at desks. This Windows-based app activates when users connect their computers to docking stations, streamlining the experience.

Straightforward, hassle free software **Implementation** and priority **Support** when you need us

Our implementation team are on hand as soon as you're ready to get started with your setup. Once you're ready to go live, we offer online support via a chat portal or email.

Implementation

Our onboarding service is offered remotely. Once the configuration is complete we'll set up a video call at a time that works for both parties. During the call, we'll walk you through the software's features to ensure that you're getting the most out of it.

Online Support

We've got you covered with support included in all of our plans. Our customer service representatives are available to chat online in real-time, directly from your dashboard. You can also raise a ticket via email if you prefer.

Knowledgebase

Our knowledge base provides step-by-step instructions for setting up and using all of our modules, ensuring that everyone can take full advantage of our system with ease.
